

Operating System Requirements and Compatibility (Cow Sense v4)

Windows XP

- Full compatibility for 32-bit version of Windows XP.

Windows Vista

- Full compatibility for 32-bit version of Windows Vista with User Account Control (UAC) turned off.
- User Account Control (UAC) must be turned off to properly install and operate Cow Sense on 32-bit Vista.
Refer to <http://www.cowsense.com/docs/psb/psb011.pdf>.
- If you are running the 64-bit version of Windows Vista, you should install VirtualBox with a 32-bit operating system in order to run Cow Sense (and any other 16-bit applications).
Refer to <http://www.cowsense.com/docs/virtualbox.pdf>.

Windows 7

- Full compatibility for 32-bit version of Windows 7 with User Account Control (UAC) at the lowest setting.
Refer to <http://www.cowsense.com/docs/psb/psb011.pdf>.
- If you are running the 64-bit version of Windows 7 Professional, you should install and use XP Mode in order to run 16-bit applications like Cow Sense.
Refer to <http://www.microsoft.com/windows/virtual-pc/default.aspx>.
- If you are running the 64-bit version of Windows 7 Home Premium, you should install VirtualBox with a 32-bit operating system in order to run Cow Sense (and any other 16-bit applications).
Refer to <http://www.cowsense.com/docs/virtualbox.pdf>.

Windows 8 & Windows 10

- Full compatibility for 32-bit version of Windows 8 & Windows 10. Please call for special installation instructions.
- If you are running the 64-bit version of Windows 8 or Windows 10, you should install VirtualBox with a 32-bit operating system in order to run Cow Sense (and any other 16-bit applications).
Refer to <http://www.cowsense.com/docs/virtualbox.pdf>.

Macintosh / Apple

- Use Boot Camp Assistant.
Refer to <http://www.apple.com/findouthow/mac/tutorials/windowsonmac.html>.
